Cordless rechargeable lamps

CHIARO DI LUNA

ATMOSPHERE LAMP

www.chiarodilunadesign.com

Chiaro di Luna is a young company, an idea conceived on the way back from a journey, from a land where nature sets the rhythm of time, and the nights are lit up by a billion stars, galaxies and the Moon, when it feels like showing its face.

Hence the need for a portable light source, to take wherever you want: a cordless rechargeable lamp.

Back in 2016 we were amongst the first to offer rechargeable battery lamps. Today we are rich in ideas and experience and by listening to customers' needs we have expanded and improved our range of products:

We can offer four completely different models and others are in the pipeline.

Our lamps are handcrafted and provide an exceptionally high level of autonomous performance.

Rivetto

Minimal and discreet, it creates a warm and sophisticated atmosphere of intimacy in any location. Take it wherever you want and you cannot help but use it! Its autonomy lasts 50 hours at maximum intensity and over 10 days at the minimum.

Lucy

Extremely versatile cordless rechargeable lamp, suitable for every situation where you want to create a warm, welcoming atmosphere. Thanks to its accessories, it comes in different shapes: on the table for a modern sophisticated effect - in the garden transforming it into a special setting – at home to light up your favourite painting.

It has 14 hours of autonomy at maximum intensity and over 200 hours at the minimum.

Candle 2.0

The candle for the third millenium.

Its autonomy is about 10 hours

Perla

The elegance of this lamp is perfect for a classical and sophisticated location. Its downward-angled opalescent light still manages to create a warm yet discrete intimacy.

It has a 50-hour autonomy at its maximum intensity and over 10 days at the minimum.
